FLOOR DEBATE

May 13, 2003

LB 283, 285, 407

as LB 285, with the bringing in \$242 million. I've supported that, and I think that...continue to support that through. And then also, the green copy on LB 283, I've been supportive of that. And I don't know whether we'll ever get back to that copy. I just figured that it's went to the committee amendments now, which cut things in half. But I know one thing. If we end up going into a special session, which some people said something about, it won't be adding no new tax; it will be all cuts from then on. And so we need to figure out how we can make it work more so right here and so we won't have to be back in a special session. I realize we're still \$100 million apart. And I know this is a...Senator Erdman's here is \$80 million. But I'm kind of like a lot of the rest of them. It's hard to support every item in it. But I hope this generates enough discussion that there will be a lot of parts of this will show up in other amendments that's coming up forward after this. I have amendment myself that I can probably bring forward if we have to, but right now it's included in his. But to support the whole thing straight through, it's going to be hard to do and hard to get enough votes to do it. I hope we can get enough discussion on it that will give the people enough ideas that maybe we can just stop with this and work with the individual amendments, and not have to come to a decision on trying to support all of this or none of it at all. Because there's a lot of things I can support in it, but there's things I cannot, so it's going to be hard to say, well, I'm going to support this or not support it. But I sure commend him for bringing it, because I think it's did the right thing today. It's brought the discussion to the floor and we're all talking about it. And there's some good ideas in it. So I think it's going to be something we need to talk about. I know a lot of people have got this little slip that's been sent around, the Nebraska voters' preference on what type of tax to increase on. And of course, the number one is alcohol tax, the way this comes up with, and cigarettes next. And the the third is expand sales tax. But I'm still concerned how come that they got food tax as low as it is, because I've had coffees in my district, and everybody says, well, why don't you increase the food tax, because that is something that everybody eats...pays on, and we got food stamps for the poor, so I cannot figure out why we don't increase the food tax. But I tell them, well,
